Leslie Goldberg

Sir:

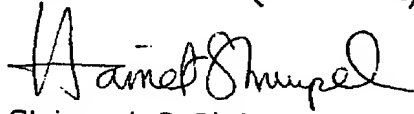

Interview Summary

The Examiner is thanked for the Interview summaries dated July 20, 2006 referring to telephonic interviews dated July 10 and July 17. The summaries of the interviews appear to include all the applicable items required under MPEP Section 713.04.

Applicants would like to correct one point in the interview summary for July 10, 2006.

The Examiner states "Regarding Capone et al. Dr Noren indicated that the Capone phage cannot display Sel within a peptide." In fact, Dr Noren stated that the Capone et al. reference describes a reporter system for general non-sense suppression and it was agreed that this had nothing to do with phage display or indeed selenocysteine-containing peptides.

Respectfully submitted (for the file) by:

A handwritten signature in black ink, appearing to read "Harriet Strimpel". The signature is fluid and cursive, with the first name "Harriet" and last name "Strimpel" clearly distinguishable.

Harriet Strimpel, D.Phil.
